<p>Presumed Inhumation Grave of the Endeneolithic Period (around 2900 B.C.) Location: 2600 m east of the Protestant parish church in Giebelstadt. In the course of "Digging works for Water Line Installation" on the Giebelstadt airfield on 16 Dec. 1928, a seated burial was excavated in a depth of approx. 1.0 m. "Unfortunately ... more than half of it has been disposed of already" (OA LID). The exact finding location is given in the OA BLED in a field map (illustration). Presumed burial objects were: a small hatchet, a flint stone knife and a beaker, which dates the funeral around the end-neolithic (slight ceramics – around 2850-2500 B.C.).</p> <p>Management Recommendations: No short term actions required by law, for detailed informations see chapter 5.2.</p>
